

TAICUN LIN (林泰村)

AIoT Software Engineer

PHONE 0936920099 / taicunlin@gmail.com / [Online-CV\(link\)](#)

SUMMARY

AI Platform:

Intel, NVIDIA, AMD, Hailo

Programming:

Python, C#

AI & Computer Vision:

OpenCV, OpenVINO, ONNX Runtime

Industrial AIoT:

MQTT, Sensor Integration, Real-Time Monitoring

- 10+ years of experience in AIoT, industrial automation, and software development.
- Specialized in OpenVINO, Computer Vision, and Edge AI deployment.
- Developed AIoT solutions with machine vision, MQTT, industrial sensors, and real-time monitoring.
- Evaluated AI platforms across Intel, NVIDIA, AMD, Hailo, and other accelerators.
- Experienced in proof-of-concept development, reference design creation, and customer deployment projects.

EDUCATION

MASTER in **National Taiwan University** - Medical Device and Imaging

BACHELOR in **FuJen University** - Computer Science and Information Engineering

EXPERIENCE

 **Pr. AI Application Engineer** in **iEi**

2023/04 – Present

- ✓ **Cross-Platform AI Deployment** - Evaluate Intel, NVIDIA, AMD, Qualcomm, Hailo, Rockchip, Axelera, DeepX, and MemryX platforms, comparing AI performance, software ecosystems, deployment workflows, and solution readiness. Establish benchmarking and validation processes for emerging AI technologies.
- ✓ **Edge AI Solution Development** - Leverage Intel ecosystem experience to design and develop Edge AI solutions for industrial applications. Research AI models, develop demonstration systems and proof-of-concept projects, and integrate AI software, industrial computers, sensors, and customer devices into deployable solutions.
- ✓ **Key Products** - Developed AiEi, an Edge AI vision platform supporting intelligent surveillance, industrial safety monitoring, and natural language video search. And developed Can AIBOX, an Intel NPU-based AI appliance with built-in AI models and MQTT integration for rapid AIoT solution deployment.
- ✓ **OpenVINO & AI Framework Validation** - Validate OpenVINO, Intel Geti, Edge Insights for Vision (EIV), DLStreamer, IPEX, and related AI toolchains across Intel CPU, iGPU, dGPU, and NPU platforms. Evaluate AI deployment workflows covering model conversion, optimization, benchmarking, and production deployment.
- ✓ **Industrial AI Applications** - Develop AI solutions for industrial vision, smart manufacturing, automated inspection, smart monitoring, AMR safety systems, and AIoT applications.
- ✓ **Technical Marketing & Ecosystem Enablement** - Support industry exhibitions, partner engagements, technical demonstrations, and ecosystem collaboration activities, including Computex, Automation Taipei, and joint solution showcases.

EXPERIENCE

**Service Manager****in****Blueskies.AI (INTEL)****AI Startup, Intel ISP Project***2021/06 – 2022/11**

- ✓ **AIoT Solution Development-** Developed end-to-end AIoT inspection solutions integrating machine vision, industrial sensors, MQTT communication, edge computing, and real-time monitoring systems. Utilized Python, OpenCV, PyGTK, Node-RED, Grafana, Docker, and Ubuntu to rapidly prototype and deliver customer solutions.
- ✓ **Edge AI Deployment** - Leveraged Intel OpenVINO, Intel Geti, and Edge Insights for Industrial (EII) to accelerate AI model training, validation, deployment, and lifecycle management across industrial environments.
- ✓ **Machine Vision Inspection-** Developed AI-powered visual inspection solutions for pharmaceutical and manufacturing applications. Designed image acquisition, preprocessing, AI inference, and defect detection workflows using Basler industrial cameras and Edge AI platforms.
- ✓ **System Integration & Deployment-** Integrated AI solutions with customer manufacturing systems, industrial equipment, and third-party software platforms. Responsible for deployment, validation testing, technical support, and customer delivery.

**AIoT Software Engineer****in INTEL****2015/11 – 2021/05**

- ✓ **Industrial IoT & Edge Solutions** - Supported Industrial IoT projects including smart agriculture, equipment monitoring, factory digitalization, and industrial automation applications. Integrated sensors, industrial gateways, industrial PCs, and edge computing platforms to enable real-time monitoring, data collection, and operational visibility.
- ✓ **Edge AI & Computer Vision** - Enabled OpenVINO-based computer vision and AI inference solutions across Intel CPU, integrated GPU, and Intel Movidius VPU platforms. Evaluated model performance, developed proof-of-concept projects, and assisted customers in AI deployment and platform selection.
- ✓ **Platform Validation & Reference Design** - Researched and validated Intel AIoT technologies including OpenVINO, Open Model Zoo, Intel Geti, TSN, TCC, ACRN, and vPro. Developed demonstration systems, benchmarking tools, reference designs, and technical documentation to accelerate customer adoption and product development.
- ✓ **Customer Solution Development** - Developed proof-of-concept projects and demonstration systems by integrating sensors, industrial gateways, cloud platforms, industrial computers, and third-party software. Delivered solutions across smart manufacturing, smart retail, equipment monitoring, and security surveillance applications.
- ✓ **Ecosystem Enablement & Technical Support** - Provided technical consultation, training sessions, workshops, and deployment support for ODM/OEM partners, system integrators, and enterprise customers. Collaborated with sales teams and ecosystem partners to promote Intel AIoT and Edge AI solutions through customer engagements, demonstrations, and technical enablement activities.
- ✓ **Industry Engagement** - Represented Intel AIoT and Edge AI solutions at international exhibitions and technical conferences, including Computex, Embedded World, Hannover Messe, and CIIF. Collaborated with ecosystem partners to showcase Intel technologies, reference solutions, and industry applications.

EXPERIENCE

Technical Account Manager in Microsoft

2014/08 – 2015/07

- ✓ **Enterprise Technical Support** - Served as the primary technical contact for enterprise customers, providing technical consulting, system deployment support, troubleshooting services, and operational guidance for Microsoft enterprise platforms.
- ✓ **IT Process Automation**- Developed PowerShell, C#, and .NET automation tools for account lifecycle management, access control, and IT operations. Supported Active Directory account provisioning and deprovisioning, Exchange mailbox migration, and file permission management, improving administrative efficiency and reducing operational overhead.
- ✓ **Customer Solution Consulting** - Monitored customer requirements and system usage, providing technical recommendations, troubleshooting assistance, and solution planning to improve operational effectiveness.
- ✓ **Identity & Access Management** - Developed a strong understanding of customer organizational structures, information security policies, and operational workflows. Provided best-practice recommendations for identity management, access control, email systems, and enterprise collaboration platforms.

Security Engineer

in Acer

2013/07 – 2014/07

- ✓ **Security Assessment** - Performed security assessments of enterprise websites and web applications using vulnerability scanning tools to identify potential security risks and validate findings.
- ✓ **Vulnerability Analysis** - Conducted vulnerability analysis based on industry best practices, including the OWASP Top 10, and provided assessment reports with remediation recommendations.
- ✓ **Software Quality Assurance** - Participated in web application functional testing, release validation, and pre-production testing activities to ensure system quality, functionality, and stability.
- ✓ **Defect Management** - Assisted in reproducing, tracking, and verifying software defects, working closely with development teams to resolve issues and improve application reliability.

OTHER EXPERIENCE

Holiday Customer Engineer in TIIS(東宜資訊)

2012/03 – 2017/07

- ✓ Assisted with government information system deployment and user training programs.
- ✓ Provided system operation support and user issue troubleshooting.

Summer Intern

in IISI(資拓宏宇)

2013/07 – 2013/08

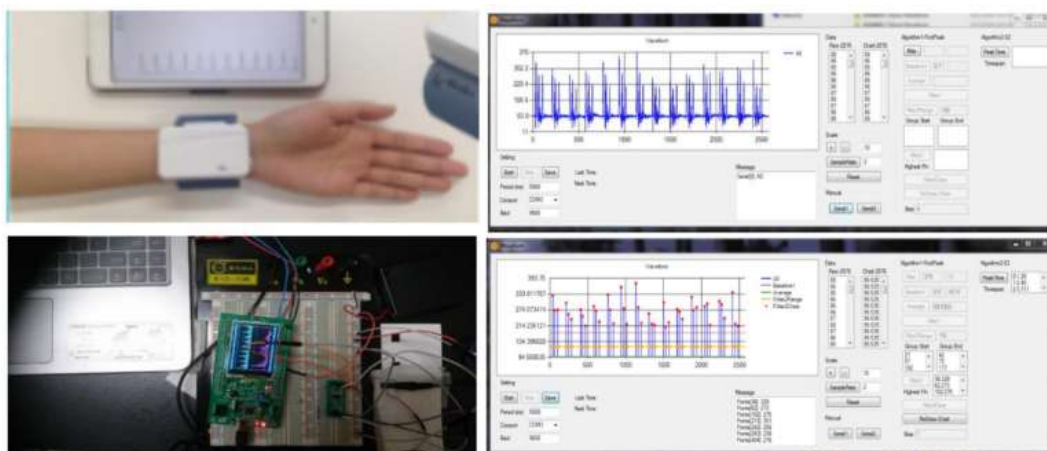

- ✓ Provided technical support and maintenance services for POS systems and IT equipment.
- ✓ Assisted customers with issue diagnosis and troubleshooting.

EDUCATION

MASTER in National Taiwan University - Medical Device and Imaging

2015/10 – 2018/01

- ✓ Developed Windows-based applications for physiological signal acquisition, visualization, and analysis by integrating Bluetooth-enabled wearable and medical devices.
- ✓ Established data collection, processing, and analysis workflows for physiological signals, including blood pressure, blood oxygen saturation (SpO₂), electrocardiography (ECG), and phonocardiography (PCG).
- ✓ Integrated sensors, wireless communication technologies, and software applications to build real-time physiological monitoring and data acquisition systems.
- ✓ Conducted research on biomedical signal processing and noise reduction techniques to support disease detection and healthcare-related studies.
- ✓ Collaborated with graduate students from multidisciplinary backgrounds and researchers at National Taiwan University Hospital on human-subject studies and data collection, building practical experience in sensor integration and monitoring system development.

BACHELOR in Fu Jen Catholic University - Computer Science and Information Engineering

2009/09 – 2014/06

- ✓ Developed a Kinect-based motion-sensing interactive game using C#, XNA, and Microsoft Kinect.
- ✓ Applied depth sensing and skeletal tracking technologies for real-time motion recognition and human-computer interaction.
- ✓ Completed software development projects and coursework using Java and C#.
