PHONE 0936920099 / taicunlin@gmail.com / [Online-CV\(link\)](#)

SUMMARY

- ✓ AIoT / EdgeAI / SW-HW Integrate / MTK Support
- ✓ Proficient in Python, C#, and AI application development.
- ✓ Experienced in full-stack AIoT solution development, integrating sensors, gateways, industrial PCs, MQTT, databases, computer vision, AI models, and cloud services.

EDUCATION

Master's Degree in Nation Taiwan University

Medical Device and Imaging

Bachelor's Degree in Fu Jen University

Computer Science

EXPERIENCE

Pr. AI Application Engineer in iEi

2023/04 – Present

- ✓ **AI Platform & Solution Development** – Evaluated Intel, NVIDIA, AMD, Hailo, and emerging AI accelerators, developing Edge AI solutions for industrial applications.
- ✓ **Key Products** – Developed AiEi intelligent surveillance platform and Can AIBOX Intel NPU-based AI appliance for rapid AIoT deployment.

Service Manager

in **Blueskies.AI(INTEL)**
*ISP for Intel project

2021 - 2022

- ✓ **AI Model Training** – Supported dataset collection, model training, validation, and accuracy improvement for customer AI applications.
- ✓ **Ubuntu Application Development** – Developed Python/GTK-based industrial AI applications integrating AI inference, MQTT/ZMQ communication, and hardware control.

AIOT Software Engineer in INTEL

2015 - 2021

- ✓ **AIoT & Edge AI Solutions** – Developed OpenVINO-based AI solutions and proof-of-concept projects by integrating AI models, industrial devices, communication protocols, and customer systems.
- ✓ **Technical Support** – Developed benchmarking tools, automation scripts, and demonstration applications while supporting customer deployments and issue resolution.
- ✓ **Technical Marketing** – Delivered workshops, training sessions, and technical demonstrations at industry events including Computex and CIIF.

Technical Account Manager in Microsoft

2014 - 2015

- ✓ **Technical Support** – Developed PowerShell, C#, and .NET automation tools for AD/LDAP account management, Exchange migration, IIS log analysis, and enterprise IT operations. Supported Windows Server, Exchange, Active Directory, and Lync deployments.
- ✓ **Project Management** – Collaborated with SI partners on customer projects, including project tracking, requirement analysis, technical support, user training, testing, and validation.

Security Engineer

in **Acer**

2013 - 2014

- ✓ **Web Vulnerability Assessment** – Conducted website security assessments, validated vulnerabilities, and provided remediation recommendations based on OWASP Top 10.
